Projects

Flock | **github.com/moraveca/firebaseFlock.git** | **flock-51279.firebaseapp.com/**

- An app that aims to connect people in need of family with volunteers willing to open their hearts and share their time by becoming surrogate families.
- I was responsible for the back end of this app including initialization, organization and set up, usage of different databases, as well as deployment.
- The app is hosted on Firebase and includes the use of Firebase's Realtime Database, Firestore, Google Storage, and Cloud Functions, React.js, Express, Axios, and other NPM packages and components.

Sports Chat | **github.com/moraveca/sports_chat** | **sleepy-dusk-14317.herokuapp.com/**

- A chat app built around rooms. Each room is focused around one of three professional sports (MLB, NBA, or NFL), bring sports fanatics into one space to talk about the latest games.
- My core responsibilities in this app were focused on the backend, specifically user authentication, password encryption, and route setup.
- Technologies used include Node.js, Express, Sport Radar API, MySQL, Web Session, BCRYPT, and Passport.

Burger App | github.com/moraveca/burger | vast-bastion-19663.herokuapp.com/
- An app where you can add your own favorite type of burger and then 'devour' it. When a new burger is submitted, it will be added to the MySQL database. When the 'Devour' button is clicked, a MySQL query updates the burger's entry.
- I was responsible for the front end and back end of this app.
- Technologies used include node.js, express, handlebars, and MySQL as well as a local ORM to help make queries to the MySQL database. This app also follows MVC protocol.

Experience

Private Piano/Guitar Teacher   2018-Present
Beacon Academy   Crystal, MN
Work one-on-one with K-8th grade students teaching weekly lessons in piano or guitar. Coordinate and communicate with school administration, parents, and teachers to devise schedule amidst classes. Devise individualized weekly lesson plans for each student and adapt as necessary.
